Information Technology

We offer a wide range of IT services from discovery to assessment, architectural review and design to implementation with security, cost and options for every environment in mind.

Procurement

Key vendor and distributor relationships and alliances allow us to provide customers with the low cost acquisition that allows for superior implementation techniques.

Advanced Infrastructure

Superior Project Management and engineering team at Jtek allows for innovative solutions to all your engineering needs.

Cybersecurity

Jtek provides cybersecurity assessments and recommendations to protect our customer's environment from compromise and ensures compliance with all security standards. Experience with DoD STIG and FITARA scoring metrics.

Lifecycle Support

As subject matter experts in IT Service Management, JTEK Data Solutions provide our customers with full life-cycle services that support continuous process improvements, change management, technical analysis, and operational integration that are tailored to meet the needs of our customers.

RPA

Robotic Process Automation technology that anyone can use with ease. Enterprise-grade technology with the intuitive experience of a consumer application. Jtek brings ease of implementation and use to our customers.
